

# CYBER ATTACKS!

## AN ADVANCED, PERSISTANT AND GROWING THREAT, WORLDWIDE!

In a recent article in *The New York Times* entitled, *Cyberattack Hits Ukraine Then Spreads Internationally*, it was stated, “Like the **WannaCry** attacks in May, the latest global hacking took control of computers and demanded digital ransom from their owners to regain access.” Over the past couple of years, we have all learned of the massive **“HACKING”** of companies like, **Sony, Target, Google, Yahoo, FedEx**, and even **JP Morgan Chase**, to name a few. In Europe, 155 hospitals, including the **Royal London Hospital**, were hacked sending tremors across Britain's National Health Service. In addition, virtually the whole country of Ukraine, including government offices and financial institutions, were disabled. The foundation of many of these **Ransomware Hacks** is the, all but invisible, **“Man in the Middle”** attack (MitM)! The structure and implementation of this type of attack causes the typical security measures to be bypassed, laying bare targeted computer systems to digital seizure and theft! The results of these Hacks is nothing short of a worldwide crisis in cyber security!

### THE SOLUTION

#### Titan Defenseware, Inc.

*Titan's “Defender” product, is the only, patented, early detection system worldwide, capable of detecting, the virtually invisible methods deployed in a, “Man in the Middle” attack” (MitM).*

Defender stands guard over your URL, monitoring communications specifically to detect the digital

fingerprint of MitM! Defender detects the attack, pre-penetration through your firewall, while the threat is still out on the web! In this manner, Defender restores your ability to protect your IT Systems from MitM, giving you yet another layer of protection, in addition to your HTTPS/SSL security measures!

Gerald Barber, CEO of GlobalTech Holdings, Inc.(GLBH): **“In response to the tremendous increase of Cyber Attacks worldwide, Titan is introducing its “Titan Defender System!” Implementation of the Defender System into any Cyber Attack defensive arsenal will eliminate the threat from MitM attacks, thereby adding another layer of protection to your IT Systems!”**

**IF THIS EMBLEM IS NOT ON  
YOUR WEBSITE  
YOU'RE NOT PROTECTED!**
